Dear Santa Cruz County Supervisors

I ask you to support this resolution. While I believe our greatest needs for protection in the County right now are with the immigrant population, women and LGBTQ+ people, particularly trans people are at greatest risk. Actually immigrant and undocumented trans women are at the greatest risk. As a mental health provider who serves transgender adults and youth, I know how much the new federal administration's actions are impacting my clients, and how much support from the California and Santa Cruz County government makes them feel less distressed and safer.

Thank you

Finn Gratton
