**Subject:** 186 Summit Drive Tower Proposal

\*\*\*\***CAUTION:**This is an EXTERNAL email. Exercise caution. DO NOT open attachments or click links from unknown senders or unexpected email.\*\*\*\*

To the Board of Supervisors of Santa Cruz County,

Why must big tech and governments, large and small, continue to put profits over people? Placing a cell tower close to residential property dramatically lowers the value of the properties, causes injury to humans and animals and the environment, and since the frequencies are \*invisible\* unknowing people become sick without knowing the reason.

I am EMF sensitive and I own a home .18 miles from a cell tower, have direct line of sight, and I did not vote on, or even know that they had a cell tower placed there, pretending to be a tree... the cell companies that use that tower continue to increase and also add more radiation frequencies, and I have absolutely no way to say NO. This was not voted on by the public but it radiates 24/7 365 days of the year.

PLEASE think about your actions and how you vote and deny the proposal for the cell tower at 186 Summit Drive, Bonny Doon/Santa Cruz. Also PLEASE do not continue to approve these towers without becoming educated on the harm it does to humans, animals, insects and the environment.

Sincerely,  
Kim Stribling
