To whom it may concern,

I am speaking on behalf of all my brothers and sisters that live up on the summit in Bonny Doon. Who are peacefully fighting "against" a large cell tower proposal. Many do NOT want this near their homes or schools or business. I can understand why. Let me elaborate. I'll share an interesting story with you all..

Two years ago, a cell company was allowed to place a small cell tower/ cell phone receiver quite close to my home of 14 years. Prior, I was in great health!

I had no idea it was placed, until I took a different route home one day. I wondered, why I had suffered a sudden and severe three day headache, level 10? Could this tower have been the cause? I also had a few nose bleeds, (never had a nose bleed a day in my life) before this tower was placed up! On one particular day, I had a severe nose bleed for 9 hours that would not stop. I am a healthy person, so I was pretty alarmed by this.

My then 24 year old son urged me to go to Urgent Care and I did, the Dr. had no idea what the cause was? BUT, I can assume being beamed with radiation all day and night probably is not a positive thing for one's health is it? It has not been good for my own health. Did anyone alert me about this tower going up? No.

Is nothing sacred anymore, is nature not important? Are you studying the actual effects from these cell towers on people, tree's, plants, animals?? I can assure you the FCC is not nor are the cell phone companies. Money is their bottom line. Is everything for sale, including people's health? Do you understand being "connected" comes at a really high price? Because it does. Only later will people realize the harms and then it shall be a bit too late.

I urge you to support the people's health over profit. To stand up to these cell companies and to be a leader in saying "no thank you, we want to keep our mountain clean and pure and safe for all. I have a hard wired phone. It works great!

Many of us are the canaries in the coal mine. Please note, just because some people can not feel the effects, it does not mean they are not being seriously harmed by exposure to this wireless radiation. Be brave and protect the summit. I have lived here for 30 years. It has been quite heartbreaking to watch big tech come into our beach town and desecrate our sweet town with their toxic junk. Please consider my email. Thank you. Jennifer W.

I am urging you all to oppose the 140 foot proposed cell tower on the Summit in Bonny Doon, Agenda #10. We say NO! The community is watching.
